# General Specifications

EJX110B, EJX310B, and EJX430B Differential Pressure and Pressure Transmitters

## GS 01C27B01-01EN

The high performance differential pressure and pressure transmitters EJX110B, EJX310B, and EJX430B feature single crystal silicon resonant sensor and are suitable to measure liquid, gas, or steam flow as well as liquid level, density, and pressure. These transmitters transmit not only process variables but also the setting parameters using wireless signal. The transmitters run on internal batteries, and the installation cost can be decreased since hard-wiring is not required. The communication is compliant with ISA100.11a protocol specifications.

## **■ FEATURES**

## • Long Life Battery Design

Ultra low current consumption design using two high capacity lithium-thionyl chloride batteries provide wireless operation for years.

## • Security Assured Wireless Network Joining

Infrared communication between the devices for wireless network configuration and parameter setting.

#### Quick Update Time

Selectable from 0.5 second to 60 minutes for measured process value to publish wirelessly.

## ■ STANDARD SPECIFICATIONS

## **■ WIRELESS SPECIFICATIONS**

Communication protocol: ISA100.11a protocol

Data rate: 250 kbps

Frequency: 2400 - 2483.5 MHz license free ISM band

Radio security: AES 128 bit codified

RF Transmitter power: Max. 11.6 dBm (fixed) Antenna: +2 dBi Omni directional monopole type Separately sold remote antenna and antenna cables can be used.

can be used.

## **■ POWER SUPPLY SPECIFICATIONS**

Battery:

Use the dedicated battery pack.

Rated voltage: 7.2 V Rated capacity: 19 Ah

## ■ SPAN AND RANGE LIMITS

## EJX110B

#### • Total Probable Error (EJX110B M capsule)

±0.12% of Span @1:1 to 5:1 Rangedown Total probable error, known as a measure of the total performance of the transmitters under the condition of fixed line presurre.

Total Probable Error = 
$$\pm \sqrt{E_1^2 + E_2^2 + E_3^2}$$

E1: Reference Accuracy of Calibrated Span

E2: Ambient Temperature Effects per 28°C change

E3: Static Span Effects per 6.9 MPa change

## • Total Accuracy (EJX110B M capsule)

±0.12% of Span @1:1 Rangedown

±0.25% of Span @5:1 Rangedown

Total accuracy is a comprehensive measure of transmitter total performance, covering all major factors in actual installation, that cause errors in measurement.

As a standard measure, YOKOGAWA uses this to evaluate transmitter performance.

Total Accuracy = 
$$\pm \sqrt{E_1^2 + E_2^2 + (E_3 + E_4)^2 + E_5^2}$$

E1: Reference Accuracy of Calibrated Span

E2: Ambient Temperature Effects per 28°C change

E3: Static Span Effects per 6.9 MPa change

E4: Static Zero Effects per 6.9 MPa change

E5: Overpressure Effects upto overpressure 25 MPa

Not only a day-to-day changes in temperature can affect the measurement and lead to unnoticed errors; fluctuaion of line pressure, incorrect operation of three/five valve manifold leading to over-pressure events, and other phenomena can have the similar result. Total Accuracy factors in such changes and errors and provides much comprehensive and practical determination of how a transmitter will perform under actual plant operation.

## Static Pressure Effects per 6.9 MPa (1000 psi) Change (EJX110B)

## Span Effects

F, M, H, and V capsules

±0.075% of span

## Effect on Zero

Capsule	Effect
F M	±0.1% URL ±0.02% URL
H, V	±0.028% URL

## Overpressure Effects (EJX110B)

Overpressure condition: up to maximum working pressure

M, H, and V capsules

±0.03% of URL

## Stability (All normal operating condition, including overpressure effects)

EJX110B (M, H, and V capsules) and EJX430B ±0.1% of URL per 10 years

## **Battery Characteristic**

Battery pack with long life lithium-thionyl chloride batteries. With the intrinsically safe type, the battery pack is replaceable in hazardous area.

Typical battery life is 10 years at 60 seconds update time or 4 years at 10 seconds update time in the following conditions.\*

Ambient temperature: 23±2°C

Device role: IO mode

· LCD display: off

\* Environmental condition such as vibration may affect the battery life.

#### **Vibration Effects**

Less than 0.1% of URL when tested per the requirements of IEC60770-1 field or pipeline with high vibration level (10-60 Hz, 0.21 mm displacement/60-2000 Hz 3 g)

## **Mounting Position Effects**

## EJX110B and EJX430B

Rotation in diaphragm plane has no effect. Tilting up to 90 degree will cause zero shift up to 0.4 kPa (1.6 in $\rm H_2O$ ) which can be corrected by the zero adjustment.

#### EJX310B

Tilting up to 90 degree will cause zero shift up to 0.5 kPa (2.0 in $H_2O$ ) which can be corrected by the zero adjustment.

#### Response Time

#### EJX110B (Differential pressure)

150 ms for Wetted Parts material code S except for Measurement span code F. 210 ms for Wetted Parts Material Code H, M, T, A, D, and B or Measurement span code F.

#### EJX310B

150 ms

#### EJX430B

150 ms

210 ms for H capsule with Wetted Parts Material Code H, M, T, A, D, and B.

Includes dead time of 100 ms (nominal)

## Static Pressure Signal Range and Accuracy (EJX110B)

(Includes terminal-based linearity, hysteresis, and repeatability)

#### Range

Upper Range Value and Lower Range Value of the statice pressure can be set in the range between 0 and Maximum Working Pressure (MWP). The upper range value must be greater than the lower range value. Minimum setting span is 0.5 MPa (73 psi). Measuring either the pressure of high pressure side or low pressure side is user-selectable.

## Accuracy

Absolute Pressure

1 MPa or higher: ±0.2% of span

Less than 1 MPa: ±0.2%×(1 MPa/span) of span Gauge Pressure Reference

Gauge pressure reference is 1013 hPa (1 atm)

Note: Gauge pressure variable is based on the above fixed reference and thus subject to be affected by the change of atomospheric pressure.

## Minimum Pressure at Calibration\* (EJX310B)

L capsule: 130 Pa abs (1 mmHg abs)

M, A, and B capsules: 2.7 kPa abs (20 mmHg abs)

If one or two of the calibration points are smaller than the above value, the above pressure is used for testing.

In case all of the calibration points are greater than the limit, only the pressure of upper range value (URV) is applied for testing.

Specifying option code /S1 with M or A capsule will lower the limit to 130 Pa abs.

/S1 is recommended for M capsule when the specified upper range value (URV) is not exceeding 3.4 kPa abs.

## **■ FUNCTIONAL SPECIFICATIONS**

Wireless (ISA100.11a protocol) 2.4 GHz signal. Output mode, linear or square root, is selectable (EJX110B).

## **Update Time**

Measurement mode	Differential pressure	Pressure
Continuous	100 ms	100 ms
Intermittent	0.5 to 3600 s selectable	0.5 to 3600 s selectable

The transmitter shifts to the countinuous mode when the update time is set to 0.5 second.

#### **Zero Adjustment Limits**

Zero can be fully elevated or suppressed, within the lower and upper range limits of the capsule.

## **External Zero Adjustment**

External zero is continuously adjustable with 0.01% incremental resolution of span.

## Integral Indicator (LCD display)

5-digit numerical display, 6-digit unit display and bar graph.

The indicator is configurable to display one or up to three of the following variables periodically.; Differential pressure, static pressure, temperature. See also "Factory Setting."

## **Burst Pressure Limits**

69 MPa (10,000 psi) for wetted parts material S except for Measurement span F.

47 MPa (6,800 psi) for wetted parts material other than S or Measurement span F.

## **Self Diagnostics**

Capsule failure, amplifier failure, configuration error, battery alarm, wireless communication alarm and over-range error for process variables.

## **Software Download Function**

Software download function permits to update wireless field device software via ISA100.11a wireless communication.

## **Battery Pack**

2x primary lithium-thionyl chloride batteries With battery case (batteries sold separately)

## ■ NORMAL OPERATING CONDITION

(Optional features or approval codes may affect limits.)

## **Ambient Temperature Limits**

-40 to 85°C (-40 to 185°F)

-30 to 80°C (-22 to 176°F) LCD visible range

## **Process Temperature Limits**

-40 to 120°C (-40 to 248°F)

- Except EJX310B L capsule

-40 to 100°C (-40 to 212°F)

- EJX310B L capsule

## **Ambient Humidity Limits**

0 to 100% RH

## Working Pressure Limits (Silicone oil)

**Maximum Pressure Limits**

Category III, Module H, Type of Equipment: Pressure Accessory-Vessel, Type of Fluid: Liquid and Gas, Group of Fluid: 1 and 2

## **EU RoHS Directive**

EN50581

## Safety Requirement Standards

EN61010-1, EN61010-2-030

- · Installation category: I
  - (Anticipated transient overvoltage 330 V)
- Pollution degree: 2
- Indoor/Outdoor use

#### **Regulation Conformity of the Wireless Module**

- FCC Approval
- IC Approval

#### PHYSICAL SPECIFICATIONS

#### Wetted Parts Materials

Diaphragm, Cover Flange, Process Connector, Capsule Gasket, and Vent/Drain Plug Refer to "MODEL AND SUFFIX CODES."

#### **Process Connector Gasket**

PTFE Teflon

Fluorinated rubber for option code N2 and N3

#### **Non-wetted Parts Materials**

## Bolting

B7 carbon steel, 316L SST, or 660 SST

#### Housing

Low copper cast aluminum alloy

## Coating of housing

[for aluminum housing]

Urethane curing type polyester resin powder coating Mint-green paint (Munsell 5.6BG 3.3/2.9 or its equivalent)

[for option code /P□ or /X2]

Epoxy and polyurethane resin solvent coating

## **Degrees of Protection**

IP66/IP67, NEMA4X

#### Cover O-rings

Buna-N

## Name plate and tag

316 SST tag plate wired onto transmitter

## Fill Fluid

Silicone, fluorinated oil (optional)

## Weight

4.9 kg (10.8 lb)\* for wetted parts material code S except for Measurement span code F without battery pack, mounting bracket, and process connector.

5.8 kg (12.8 lb) for wetted parts material code other than S

#### Connections

Refer to "MODEL AND SUFFIX CODES." Process connection of cover flange: IEC61518

Optional codes	Optional codes		/□ Optional specification	

The "▶" marks indicate the most typical selection for each specification.

- \*1: \( \times \) Users must consider the characteristics of selected wetted parts material and influence of process fluids. Specifying inappropriate materials has the potential to cause serious damage to human body and plant facilities resulted from an unexpected leak of the corrosive process fluids.
- Order the antenna separately from accessary option.
- Remote antenna cables can be attached. Order separately from accessary option.

#### **Table. Wetted Parts Materials**

Wetted parts material code	Cover flange and process connector	Capsule	Capsule gasket	Vent/Drain plug
s#	ASTM CF-8M *1	Hastelloy C-276 *2 (Diaphragm) F316L SST, 316L SST (Others)	Teflon-coated 316L SST	316 SST

- Cast version of 316 SST. Equivalent to SCS14A.
- Hastelloy C-276 or ASTM N10276. \*2:

The #marks indicate the construction materials conform to NACE material recommendations per MR0175/ISO15156. Please refer to the latest standards for details. Selected materials also conform to NACE MR0103.

## Model EJX430B

Model	Suffix Codes		Description	
EJX430B			Gauge pressure transmitter	
Output signal	-L		Wireless communication (ISA100.11a protocol)	
Measurement span (capsule)	Α		2.5 to 500 kPa (10 to 2000 inH <sub>2</sub> O) 0.0175 to 3.5 MPa (2.5 to 500 psi) 0.08 to 16 MPa (12 to 2300 psi)	
Wetted parts material *1	□		Refer to "Wetted Parts Materials" Table.	
Process connections  0			without process connector (Rc1/4 female on the cover flanges) with Rc1/4 female process connector with Rc1/2 female process connector with 1/4 NPT female process connector with 1/2 NPT female process connector without process connector (1/4 NPT female on the cover flanges)	
Bolts and nuts m	G		B7 carbon steel 316L SST 660 SST	
-3		-7	Vertical piping, right side high pressure, and process connection down side Vertical piping, left side high pressure, and process connection down side Horizontal piping and right side high pressure Horizontal piping and left side high pressure Bottom Process Connection, left side high pressure*2 Universal flange*2	
Amplifier housing	9	8	Cast aluminum alloy with detachable antenna (2 dBi)*4 Cast aluminum alloy without antenna (N connector)*3*4	
Electrical connection J		J	No electrical connection, battery-powered type (battery case only; battery cells not included)	
Integral indicator D		D	Digital indicator	
Mounting bracket  B D K M		D K M	304 SST 2-inch pipe mounting, flat type (for horizontal piping) 304 SST or SCS13A 2-inch pipe mounting, L type (for vertical piping) 316 SST or SCS14A 2-inch pipe mounting, L type (for vertical piping) 316 SST or SCS14A 2-inch pipe mounting (for bottom process connection type) None	
Optional Codes			/□ Optional specification	

The "▶" marks indicate the most typical selection for each specification.

- \*1: \(\times\)Users must consider the characteristics of selected wetted parts material and the influence of process fluids. The use of inappropriate materials can result in the leakage of corrosive process fluids and cause injury to personnel and/or damage to plant facilities. It is also possible that the diaphragm itself can be damaged and that material from the broken diaphragm and the fill fluid can contaminate the user's process fluids.
  - Be very careful with highly corrosive process fluids such as hydrochloric acid, sulfuric acid, hydrogen sulfide, sodium hypochlorite, and high-temperature steam (150°C [302°F] or above). Contact Yokogawa for detailed information of the wetted parts material.
- Applicable for Wetted parts material code S.
- \*3: \*4: Order the antenna separately from accessary option.
- Remote antenna cables can be attached. Order separately from accessary option.

## **Table. Wetted Parts Materials**

Wetted parts material code	Cover flange and process connector	Capsule	Capsule gasket	Vent/Drain plug
s#	ASTM CF-8M *1	Hastelloy C-276 *2 (Diaphragm) F316L SST, 316L SST (Others)	Teflon-coated 316L SST	316 SST

		Test Pressure: 50 kPa (200 inH <sub>2</sub> O)	*17		T04

- Not applicable with color change option.
- \*2: Applicable for Wetted parts material code S, H, M, and T.
- \*3: The unit of MWP (Max. working pressure) on the name plate of the housing is the same unit as specified by Option code D1, D3, and D4.
- \*4: Applicable for vertical impulse piping type (Installation code -7) and Wetted parts material code S, H, M, and T.
- Applicable for wetted parts material code S; process connection code 0 and 5; and installation code -8 and -9. Not applicable for option code U1, N2, N3 and M11. No PTFE is used for wetted parts. \*5:
- \*6: Applicable for wetted parts material code S. Overpressure effects for EJX110B M, H, and V capsules: ±0.06% of URL.
- Applicable only for EJX310B M and A capsules whose upper range value is set as smaller than 53.3 kPa abs.
- \*8: Applicable for Wetted parts material code S, H, M, and T; Process connection code 3, 4, and 5; Installation code 9; and Mounting bracket code N. Process connection faces on the other side of zero adjustment screw.
- \*9: Applicable for M, H and V capsules of EJX110B with wetted parts material code S
- \*10: \*11: Material traceability certification, per EN 10204 3.1B.
- Applicable for Process connections code 0 and 5
- \*12: \*13:
- Applicable for Process connections code 1, 2, 3, and 4.

  Applicable for Capsule code F of EJX110B, Capsule code B of EJX430B and EJX310B, and all the capsules of EJX110B with wetted parts maerial code H, M, T, A, D, and B.
  Applicable for Capsule code M, H, and V of EJX110B with wetted parts material code S.
- \*14:
- \*15: Applicable for Capsule code A of EJX430B and EJX310B.
- \*16: Applicable for Capsule code H of EJX430B.
- Applicable for Capsule code L and M of EJX310B
- Pure nitrogen gas is used for oil-prohibited use (Option code K1, K2, K5, and K6).

## **■ OPTIONAL ACCESSORIES**

Product	Part number	Specification
Battery pack assembly	F9915NQ*1	Battery case, Lithium-thionyl chloride batteries 2 pieces
Batteries*2	F9915NR	Lithium-thionyl chloride batteries, 2 pieces
Battery case	F9915NK*3	Battery case only
Remote antenna cable	F9915KU	3 m with mounting bracket
	F9915KV	13 m (3 m+10 m), with arrester and mounting bracket
Antenna	F9915KW	2 dBi standard antenna
	F9915KY	6 dBi high gain antenna*4

- \*1: \*2: \*3: \*4: If you need F9915MA, please purchase F9915NQ. F9915NQ is a set of F9915MA and instruction manual. Alternatively, Tadiran SL-2780/S or TL-5930/S batteries can be purchased from your local distributor. If you need F9915NS, please purchase F9915NK. F9915NK is a set of F9915NS and instruction manual.

- Use of high gain antenna is limited by local regulation of radio and telecommunication law. Consult Yokogawa for details.

## DIMENSIONS

Unit: mm (approx. inch)

[EJX110B]

Wetted parts material code: S (except for Measurement span code F)

Vertical impulse piping type (Installation code -7 and Amplifier housing code 8)

Horizontal impulse piping type (Installation code -9 and Amplifier housing code 8) \*1

- \*1: When installation code -8 is selected, high and low pressure side on above figure are reversed. (i.e. High pressure side is on the right side.)

  \*2: When option code K1, K2, K5, or K6 is selected, add 15 mm (0.59 inch) to the value in the figure.

  \*3: When option code K1, K2, K5, or K6 is selected, add 30 mm (1.18 inch) to the value in the figure.

  \*4: When amplifier housing code 9 is selected, the value is 114 mm (4.49 inch). In this case, the figure is shown as A.

  \*5: When amplifier housing code 9 is selected, the value is 240 mm (9.45 inch). In this case, the figure is shown as A.

Unit: mm (approx. inch)

## Wetted parts material code H, M, T, A, B, and D or Measurement span code F

• Vertical impulse piping type (Installation code -7 and Amplifier housing code 8)

Horizontal impulse piping type (Installation code -9 and Amplifier housing code 8) \*1

- \*1: When installation code -8 is selected, high and low pressure side on above figure are reversed. \*1: When installation code -8 is selected, fligh and low pressure side on above figure are reversed.
  (i.e. High pressure side is on the right side.)
  \*2: When option code K1, K2, K5, or K6 is selected, add 15 mm (0.59 inch) to the value in the figure.
  \*3: When option code K1, K2, K5, or K6 is selected, add 30 mm (1.18 inch) to the value in the figure.
  \*4: 42 mm (1.65 inch) for right side high pressure.
  \*5: 21 mm (0.83 inch) for right side high pressure.
  \*6: When amplifier housing code 9 is selected, the value is 114 mm (4.49 inch). In this case, the figure is shown as A.
  \*7: When amplifier housing code 9 is selected, the value is 254 mm (10.00 inch). In this case, the figure is shown as A.

Unit: mm (approx. inch)

• Universal flange type (Installation code -U and Amplifier housing code 8) Measurement span code M, H and V

- \*1: When option code K1, K2, K5, or K6 is selected, add 30 mm (1.18 inch) to the value in the figure..
  \*2: When amplifier housing code 9 is selected, the value is 270 mm (10.63 inch). In this case, the figure is shown as A.
  \*3: When amplifier housing code 9 is selected, the value is 289 mm (11.38 inch). In this case, the figure is shown as A.

15

Unit: mm (approx. inch)

• Bottom process connection type (Installation code -B and Amplifier housing code 8) Measurement span code M, H and V

- \*1: When amplifier housing code 9 is selected, the value is 314 mm (12.36 inch). In this case, the figure is shown as A. \*2: When option code K1, K2, K5 or K6 is selected, add 30 mm (1.18 inch) to the value in the figure. \*3: When amplifier housing code 9 is selected, the value is 334 mm (13.15 inch). In this case, the figure is shown as A.

## Infrared Configuration

#### < Ordering Information >

Specify the following when ordering

- 1. Model, suffix codes, and option codes
- 2. Calibration range and unit
  - 1) Range

Calibration range can be specified with range value specifications up to 5 digits for low or high range limits within the range of -32000 to 32000. When reverse range is designated, specify Lower Range Value (LRV) as greater than Upper Range Value (URV). When Square root Output mode in EJX110B is specified, LRV must be "0 (zero)".

Unit Specify only one unit from Table A.

Table A. Available Range Unit

EJX110B, EJX430B	mmH <sub>2</sub> O, mmH <sub>2</sub> O (68°F), mmAq, mmWG, mmHg, Pa, hPa, kPa, MPa, mbar, bar, gf/cm <sup>2</sup> , kgf/cm <sup>2</sup> , inH <sub>2</sub> O, inH <sub>2</sub> O (68°F), inHg, ftH <sub>2</sub> O, ftH <sub>2</sub> O (68°F) or psi.
EJX310B	torr, Pa abs, hPa abs, kPa abs, MPa abs, mbar abs, bar abs, mmH <sub>2</sub> O abs, mmH <sub>2</sub> O abs (68°F), mmHg abs, gf/cm² abs, kgf/cm² abs, inH <sub>2</sub> O abs, inH <sub>2</sub> O abs, inH <sub>2</sub> O abs, ftH <sub>2</sub> O abs, ftH <sub>2</sub> O abs (68°F), atm, or psia.

## 3. Output mode

For choices, refer to Table B.

- For EJX110B, select either Linear or Square root.
   Specify the same mode as that of Display mode.
- For EJX310B and EJX430B, select Linear.
- 4. Display setting (SCALE)
  - Display scale and unit
     Specify either "0 to 100"

Specify either "0 to 100 %" or "Desired Range and Unit" for engineering unit scale:

- When "Desired Range and Unit" is specified, scale range can be specified with range limit specifications up to 5 digits for low or high range limits within the range of -32000 to 32000. Unit display consists of 6-digit, therefore, if the specified scaling unit excluding "/" is longer than 6-characters, the first 6 characters will be displayed on the unit display. When Square root Output mode in EJX110B is specified, LRV must be "0 (zero)".
- 2) Display mode

For choices, refer to Table B.

- For EJX110B, select either Linear or Square root. Specify the same mode as that of Display mode.
- For EJX310B and EJX430B, select Linear.

Table B. Output mode and display mode

Output mode Display mode	LINEAR	SQUARE ROOT
LINEAR	•	_
SQUARE ROOT	_	•: EJX110B —: EJX310B and EJX430B

- •: Applicable, —: Not applicable
- Tag Number (if required)
   Specify Tag number (up to 16 letters) to be engraved on the tag plate. The specified letters are written on TAG\_Name (16 letters) in the amplifier memory.
- 6. Software tag (if required) Specify this software tag when tag number which is different from the tag number specified in the "TAG NUMBER" is required. The tag number specified in "SOFTWARE TAG" will be entered on "TAG" (up to 16 letters) in the amplifier memory.
- Network ID (if required)
   Specify the number from 2 to 65535. When not specified, it will use 1 as the default.

## < Factory Setting >

Tag No.	Blank unless otherwise specified in order
Software tag	Blank unless otherwise specified in order
Network ID	'1' unless otherwise specified in order.
Static pressure display range (For EJX110B only)	'0 to 25 MPa' for M and H capsule with wetted parts material S, and, '0 to 16 MPa' for L capsule with wetted parts material S and all capsules with wetted parts material other than S, absolute value.  Measuring high pressure side.
